SKILLS

Languages	JavaScript, TypeScript, Solidity, Rust, Python
Frameworks and Libraries	React, Next.js, Hardhat, Foundry, Node.js, Ethers, Wagmi, Tailwind
Tools	Git, Docker, GitHub Actions, AWS
Familiar with	PostgreSQL, GraphQL, React Native, Move, Cairo, C

PROJECTS

StarkSwirl

StarkSwirl is a privacy-preserving token mixer that enables users to utilize public blockchains while maintaining their privacy. It leverages zero-knowledge technology for privacy, employing zk-STARKs and Cairo.

SoloPatty

A TEE-based private order book DEX, preventing MEV and executing trades privately. By keeping all trade intents private and executing them securely, SoloPatty ensures a fair and efficient trading experience for DeFi users

FundMate

A decentralized social payments app built on the Aptos blockchain, combining secure communication with cryptocurrency payments. Allows users to chat with friends, send messages, and transfer funds all within a single interface.

ACHIEVEMENTS

- **Code Collision Winner** : Secured 15000 USD for the third prize and Finalist at Aptos Code Collision for the FundMate project.
- **StarkHack Winner**: Won First Prize and 13000 USD as a Finalist at ETHGlobal's StarkHack 2024 for the StarkSwirl project.
- **Hackathons**: Winner of 9 global hackathons and 2-time ETHGlobal finalist, earning multiple bounties for innovative projects. Notably, selected as a finalist at **ETHGlobal Trifecta** for my project *SoloPatty*.

EXPERIENCE

Founding Engineer

Mentibus

Apr 2025 - Present

San Francisco, CA - Remote

- Led a team of 4 developers to architect and implement the data contribution system and end-to-end data pipelines for ingesting structured data across news, investments, companies, and events, as part of the Mentibus Community Data Project.
- Built and maintained robust CI/CD pipelines using Jenkins and AWS, integrating Hasura and Algolia for real-time data access; also supported experiments with tokenized incentives to drive quality community data contributions.

EXTRA-CURRICULAR ACTIVITIES

- Moderated communities for HELLO Labs in 2022, fostering engagement among more than 20,000 members while resolving technical inquiries that enhanced user satisfaction with platform functions.
- **Blockchain Lead** at Google Developer Groups - ABESEC. This involves organizing tech-related events in the college and providing technical guidance to community members.

EDUCATION

Bachelor of Technology - Computer Science, ABES Engineering College, Ghaziabad

Expected 2026

Relevant Coursework: Data Structures, Algorithms, OOPs, Web Development, Cybersecurity, Operating Systems, System Design, Computer Networks.
